PROFESSIONAL SUMMARY

Results-driven Backend Engineer with 4+ years of experience designing scalable microservices, RESTful APIs, and distributed database systems. Proven track record of reducing query latency by 42% and deploying cloud-native architectures on AWS.

WORK EXPERIENCE

Senior Backend Engineer | CloudScale Tech (San Francisco, CA) *(June 2022 - Present)*

- Architected and deployed 14+ high-throughput microservices using Python (FastAPI) and Golang, handling 45M+ daily requests with 99.98% uptime.
- Redesigned relational PostgreSQL schema and implemented Redis caching layer, decreasing average query response time by 42%.
- Built automated CI/CD deployment pipelines using Docker, Kubernetes, and GitHub Actions, slashing release deployment cycles from 4 days to 25 minutes.
- Integrated Kafka event streams for asynchronous payment processing, preventing duplicate transactions and processing \$12M+ in monthly transaction volume.

Software Engineer | FinFlow Systems (Austin, TX) *(July 2020 - May 2022)*

- Developed REST and GraphQL APIs using Node.js, Express, and MongoDB for a core fintech banking dashboard with 85,000 active users.
- Implemented OAuth2 / JWT authentication protocol with role-based access control (RBAC), securing sensitive financial client data.
- Authored 300+ unit and integration test cases using PyTest and Jest, boosting code coverage from 62% to 91%.

TECHNICAL & CORE SKILLS

Languages: Python, Go, JavaScript, TypeScript, SQL, Bash

Frameworks: FastAPI, Django, Flask, Express, Node.js

Databases & Queues: PostgreSQL, MySQL, MongoDB, Redis, Apache Kafka, RabbitMQ

Cloud & DevOps: AWS (ECS, S3, RDS, Lambda), Docker, Kubernetes, Terraform, CI/CD, Git

EDUCATION

Bachelor of Science in Computer Science — University of California, Berkeley (2016 - 2020)
